

User Manual

Ionisationbrush for short and long hair

Caution! Do not use switched on brush if you have wet hair!

Mode of operation:

Hairbutler Corinne cares for your hair in a special way. By the production of negative oxygen ions, **Corinne** will make your hair smoother. The result is that your hair will be pliant and easy to comb and it gets back elasticity, brightness and energy. Activated oxygen neutralizes all smells and bad odours sticking in your hair. Brush your hair with **Corinne** during 2-5 minutes. Your hair gets back its original energy and elasticity. Static charge will be neutralized.

How to operate:

Before operation: Open **Corinne**, open the batterybox in the handle. Insert 2 batteries (Mignon 2 AA). Close the box. Switch on **Corinne** by pushing the on/off button. A small green light shows the operational status. **Corinne** starts immediately the production of negative oxygen ions and activated oxygen. After having finished brushing, push the on/off button and switch off **Corinne**. Close **Corinne** and take care of her until the next use. Batteries with a high quality have a service life from around 500 operation hours (100 days á 5 minutes). Necessary change of battery will be shown by a weak green light

CORINNE

How to change the Brush:

The different brushes will be fixed with a "Click"-fastener at the tool. Put the needed piece in the inclusion of the casing and push the brush to the handle. For changing or cleaning work the other way back.

Caution:

- Don't use **Corinne** when you have wet hair (streampushes)
- Don't use **Corinne** for your animal.
- Clean the used brushed regularly.
- Don't put any metal objects into **Corinne**, to avoid streampushes and defects.
- **Corinne** has to be kept away from inflammable and explosive objects.
- **Corinne** should not be laid in water.
- Avoid keeping **Corinne** near heaters or other hot places, because this can deformate the casing.
- For cleaning the casing avoid to use alcohol or petrol, because they can damage the casing.
- Clean the brushes with warm water and soap.
